

Multi-purpose Stadium Address: 1800 South 14th Street, Midlothian, Texas

Greg Goerig, LAT greg_goerig@misd.gs

Sophia Gutierrez, MS, LAT, ATC sophia.gutierrez@misd.gs

Bus Parking

Each school is allowed three bus parking spots behind the locker rooms at the north end. There may also be additional spots for school suburbans/trucks. Any additional buses or trailers/equipment trucks will need to park in the east parking lot which is designated for visitors.

Locker rooms

Both home and visitor locker rooms are on the north end of the stadium. Inside each locker room, you will have access to an ice machine and water (there should be a hose in each locker room). There is a separate

dressings room for coaches as well. There is a “tape room” attached to each locker room, this room can be accessed both through the locker room or from outside the building. The tape room will have both three taping tables and a treatment table. Your locker room will be the one closest to the tunnel.

Athletic Training Info

Best option for equipment unloading would be at the north end of the field. On the map, there is a star at the gate with best access for teams. **For MISD football games, there will be a game administrator that may be able to help drive your equipment down to the field, please let us know if you need assistance with that. From that gate, there is a steep tunnel down to the field. At each 50 yd line there is access to water (bring a water key and water hose just in case!) and a table. At request, we can provide an in-line water drinker as well. There is an AED at the bottom of the tunnel in a box mounted to the wall.

Press box

Access to the pressbox is via stairs from inside the stadium, or via an elevator from outside the stadium. The second floor has rooms for coaches, media and announcer. There is also an AED on this floor in a box mounted to the wall. The third floor has a film deck and rooms for school district officials.
